Second Preparatory grade primary - Weekly assessment and homework - First week (1)

Weekly Assessment: (اختار اختبار واحد فقط مع الواجب المنزلي)

Test 1

1- The home page is the first page on the website through which you can move to the rest of the website pages.   (   )

2- A website is a web page or more linked together under a specific name.   (   )

Test 2

1- The abbreviation HTML refers to the phrase Hyper Text Markup Language.   (   )

2- A website is an address on the Internet called Title.   (   )

Test 3

1- A website is a document with electronic content published on the Internet.   (   )

2- The components of a web page are texts only.   (   )

Class Evaluation

Learn Open the Egyptian Knowledge Bank website and browse its pages.

Homework

1- The address of a website on the Internet is called

a- Web Address

b- Web Page

c- Static Web .

d- Dynamic Web .

2- The website can be visited through

a- The website address

b- The website code

c- The control panel

d. The taskbar

Second Preparatory grade primary - Weekly assessment and homework - week (2)

Weekly Assessment: (اختار اختبار واحد فقط مع الواجب المنزلي)

Test 1

1- Web pages that use only HTML in their design are considered interactive pages.   (   )

2- To design an interactive web page, we use a language such as Java Script and PHP. (   )

Test 2

1- Static web pages are written in PHP.   (   )

2- Interactive web pages are affected by the user's operations.   (   )

Test 3

1- The worksheet is the first page on the website through which you can move to the rest of the site's pages.   (   )

2- Static page is a page is Designed using HTML commands JavaScript language.   (   )

Class assessment

1- Search the Internet for the most important programming languages used in designing Web pages.

Homework:

1- One of the characteristics of a static web page is that it is written in a language.

a- PHP   b- JavaScript .

c- HTML .   d- Visual Basic .

2- Is a page that is designed using HTML commands in addition to other languages Such as JavaScript, PHP, etc.

a- Interactive   b. Static

c. Basic   d. Imaginary

Second Preparatory grade primary - Weekly assessment and homework - week (3)

Weekly Assessment: (اختار اختبار واحد فقط مع الواجب المنزلي)

Test 1

1- The publishing stage is where text data, images, and video clips are collected and saved in a folder.   (   )

2- The design phase is where storage space is allocated for the website on the Internet.

                                                            (   )

Test 2

1- The publishing phase is the last phase of designing and creating web pages.   (   )

2- The implementation stage is where the paper design is converted into web pages To design

                                                            (   )

Test 3

1- The preparation and processing phase is where text data, images, and video clips are collected and saved in a folder.   (   )

2- Publishing the website online means putting data on web pages.   (   )

Evaluation

Prepare a presentation consisting of 2 slides about the stages of designing and creating a website.

Homework

1- The first stages of designing and creating a website

a. Design   b. Publishing

c. Planning   d. Implementation

2- HTML and other web programming languages are used in the stage

a. Design   b. Publishing

c. Planning   d. Implementation

Weekly Assessment: (اختار اختبار واحد فقط مع الواجب المنزلي)

Test 1

1- In the preparation and setup phase to create the website, a folder is created to save the required images.   (   )
2- The web page cannot contain images and texts at the same time.   (   )

Test 2

1- In the implementation phase, the paper design is converted into web pages.   (   )
2- The images that appear on the web page must be grayscale only.   (   )

Test 3

1- The website is a document published on the Internet.   (   )
2- The web page does not accept written texts.   (   )

Evaluation

Make a diagram of the pages of my school website.

Homework

1- The first stages of designing and creating a website
A - Design.
B - Publishing.
C - Planning.
D - Implementation.

2- The stage in which text data, images and video clips are collected and saved in a folder is
A - Implementation.
B - Publishing.
C - Preparation and equipment
D - Design.

Weekly Assessment:

Test1

Put a mark (✓) or (x) :

1- Most HTML commands start with <> and end with <>.   (   )

2- HTML commands must be written in uppercase and lowercase letters.   (   )

Test2

1- HTML is a coding language used to create static web pages.   (   )

2- The area for writing information to the browser such as the page title is <head>   (   )

Test 3

1- Body is the area for writing the content that will be on the page.   (   )

2- To add content to the web page, we use the Title command.   (   )

Class Assessment

Using the text formatter, write the basic rules for creating a web page using HTML.

Homework:

Choose the appropriate answer to complete each of the following statements:

1- The HTML command file must be saved with the extension ....

A- HTML   B- JPG

C- docx .   D- js.

2- The HTML code is written using the program ....

A- Browser   B- Paint

C- Text Editor   D- Gimp

Second Preparatory Grade - Weekly Assessment and Homework - Week Six (6)

Weekly Assessment:

Test 1

1- Paint can be used to write HTML tag.   (   )

2- The structural structure of the web page includes the Body tag.   (   )

Test 2

1- The title of the web page is written inside the Body area.   (   )

2- Notepad cannot be used to write HTML tag.   (   )

Test 3

1- Body is the area for writing content   (   )

2- The title of the web page appears in the title bar of the browser window.   (   )

Class Assessment

Using one of the text formatters, create a web page titled "Computer World".

Homework:

1- To add a title to the web page, we use the ..... tag

A- HTML .

B- Title .

C- Head .

D- Body .

2- The Title command is written in the structural structure of the HTML tag ..... .

A. Inside the Head area.

B. Inside the Body area

C- After the Body area.

D- Before the Head area

Second Preparatory Grade - Weekly Assessment and Homework - Week Seven (7)

Weekly Assessment:

Test 1

Put a mark (✓) or (x) :

1. In HTML, tags can be written in capital letters or small letters. (   )

2. We use the dir attribute to change the direction of the web page. (   )

Test 2

1. The browser is not affected by the spaces left inside the command file for the web page.

(   )

2. We use RTL to change the direction of the page from right to left. (   )

Test 3

1- We use LTR to change the direction of the page from right to left. (   )

2- We use the dir attribute to change the direction of the web page. (   )

Class Assessment

Using one of the text formatters, design a web page titled "My School".

Homework

1- We use .... to change the direction of the page from left to right.

A- ltr

B- rtl

C- right

D- Left

2- To change the direction of the web page to be from right to left we use the dir attribute of the command .....

A- Head

B- Title

C- Body

D- Html

Weekly Assessment:

Test 1

1- The text that appears on the web page can be formatted.   (   )

2- We use the <br> tag to end writing on the current line and start writing on a new line.

(   )

Test 2

1. Centering the text is considered one of the text formatting operations.   (   )

2. To place text in the middle of the line, we use the <center> tag.   (   )

Test 3

1. One of the web page formats is to place an image as a background for the page.   (   )

2. To end writing on the current line and start writing on a new line, we use the <center> tag.

(   )

Class Evaluation

Using one of the text formatters, add the phrase "school website" to the web page so that it appears in the middle of the line at the beginning of the web page.

Homework

1 - We use tag .... to end typing on the current line and start typing on a new line

    A - ltr

    B - rtl

    C- br

    D - left

2 - We use tag .... to put text in the middle of the line

    A - Head

    B - Title

    C- Body

    D – center

Weekly Assessment:

Test1

1- An image can be placed as a background for a web page. ( )

2- Formatting a page includes changing the background color of the web page. ( )

Test 2

1, The Background attribute of the <body> tag is used to place an image as a background for a web page. ( )

2- It is not possible to change the background color of a web page. ( )

Test 3

1- The Backcolor attribute of the <body> tag is used to place an image as a background for a web page. ( )

2- Formatting a page includes changing the background color of the web page. ( )

Class Evaluation

Using one of the text formatters, write the code needed to place the image spring.jpg which is stored in the same page storage folder as the background of the web page

----

Homework

1- We use the code ..... to place the image school.jpg which is stored in the same page storage folder as the background of the web page.

A- <body backimage=" school.jpg">

B- <body ground=" school.jpg>

C-' <body backcolor=" school.jpg">

D- <body background=" school.jpg>

2- The ..... attribute of the <body> tag is used to place an image as the background of the web page

A- Background.

B- Title.

C- Body.

D- Center

Second Preparatory grade primary - Weekly assessment and homework - First week (1)
